

5.

$$(1) 36 - \frac{1}{3}P = -9 + 0.5P$$

$$45 = \frac{5}{6}P$$

$$P = 54$$

$$Q = 18$$

$$(2) \frac{54}{18} * \frac{1}{3} = 1$$

$$(3) \frac{54}{18} * 0.5$$

$$= \frac{9}{6}$$

$$= \frac{2}{3}$$

$$= 1.5$$
