

CheckBox 的使用

按下小字型，可以直接變化字型大小

CheckBox **smallFont** ;

Button **btn1**;

TextView **txv1**;

@Override

protected void onCreate(Bundle savedInstanceState) {

 super.onCreate(savedInstanceState);

 setContentView(R.layout.*activity_main*);

 // *chk1* = (CheckBox) findViewById(R.id.*chk1*);

btn1 =(Button) findViewById(R.id.*btn1*);

txv1 = (TextView) findViewById(R.id.*txv1*);

smallFont =(CheckBox) findViewById(R.id.*smallFont*);

smallFont.setOnCheckedChangeListener(new CheckBox.OnCheckedChangeListener() {

 @Override

 public void onCheckedChanged(CompoundButton buttonView, boolean isChecked) {

 if(isChecked)

txv1.setTextSize(15);

 else

txv1.setTextSize(30);

 }

 });
