I am studying mechanical engineering at Southern Taiwan University of Science and Technology. It is a four-year course. When I complete the course, I will get a BEng. The main subject are Statics, Dynamics and Thermodynamics. The subject I find most difficult is Dynamics. I find it difficult because hard to understand. The subject I enjoy most is Technology. I have twenty-three classes each week. Classes start each day at 8:10 and finish at 17:40. When I finish my course, I hope to be a repairman.
