

I'm studying Department of mechanical at Southern Taiwan of Science and Technology. It's a four-year course. When I complete the course, I will get a college of bachelor's degree. The main subjects are calculus 、electronics thermodynamics. The subject I find most difficult is calculus. The subject I enjoy most is PE. I have twenty-eight classes eah week. Classes start each day at eight-ten o'clock and finish at five-forty o'clock. I have self-study time at night on weekend. When I finish my course,I hope to become Auto Mechanic.
