

Find the solution $y+5 = \ln(y')$, $y(0)=1$. [106 中興精密 7(a)]

$$\begin{aligned} [\text{解}] \text{原式} \Rightarrow y' &= e^{y+5} \Rightarrow \frac{dy}{dx} = e^{y+5} \Rightarrow e^{-(y+5)} dy = dx \Rightarrow \int e^{-(y+5)} dy + C = \int dx \\ -e^{-(y+5)} + C &= x \Rightarrow x + e^{-(y+5)} = C \\ y(0) = 1 \Rightarrow 0 + e^{-6} &= C \Rightarrow C = e^{-6} \\ \text{解為 } x + e^{-(y+5)} &= e^{-6} \end{aligned}$$
